

PRECISION DESIGN SOLUTIONS

I didn't know I could move so fast while achieving such a high quality of work until I worked with PDS.

SERVICES OFFERED

We provide proven geospatial design expertise powered by industry-leading tools like IKE and Katapult and deep experience across 3GIS, QGIS, AGOL, and client GIS environments. With a strong command of NESC standards, anchoring, and tensioning, we deliver precise, compliant designs that minimize risk and keep projects moving.

Our streamlined workflows and experienced teams accelerate project timelines, reduce rework, and lower overall design costs. By delivering right-first-time solutions at scale, we help clients maximize ROI while maintaining the highest standards of safety, quality, and reliability.

DESIGN & PERMITTING SERVICES:

- FTT(x) design
- Permit Drafting and Design
- Construction Drawings
- As-Built
- HLD
- Basemapping

FIELDING SERVICES:

- Make-Ready
- Make-Ready Engineering
- PLA
